**MAIN PARKING LOT WILL BE RELOCATED TEMPORARILY
STARTING DECEMBER 6th**

HYANNIS – The main parking lot at Barnstable Municipal Airport will be re-located temporarily starting Monday, December 6th to make way for construction of a new passenger terminal. The lot will shift from the left side of the airport’s main entrance road to the right side; motorists will have to make a right turn to enter the lot as they come onto the airport campus from the Airport Rotary.

Airport Manager Roland “Bud” Breault said the number of parking spaces will decrease by a third to about 400 while the temporary lot is in use. “There should not be a capacity problem since demand is lowest at this time of year,” he said. “About half of the new spaces will be paved; the rest will have a gravel surface.”

There will also be a new pedestrian walkway from the temporary parking lot to the entrance of the main terminal.

Since short-term parking meters will be removed, a departing passenger should park first and carry bags into the terminal. If two or more passengers are departing, they may pull up their vehicle to the main terminal to unload bags. One passenger should watch the bags while the other parks.

Breault cautioned that the main roadway to the terminal will have two-way traffic once the lot relocation takes place. “We’re encouraging drivers to proceed cautiously until they get

used to the new traffic pattern. The current exit road along the fence line near the demolished Terminal II will be closed.”

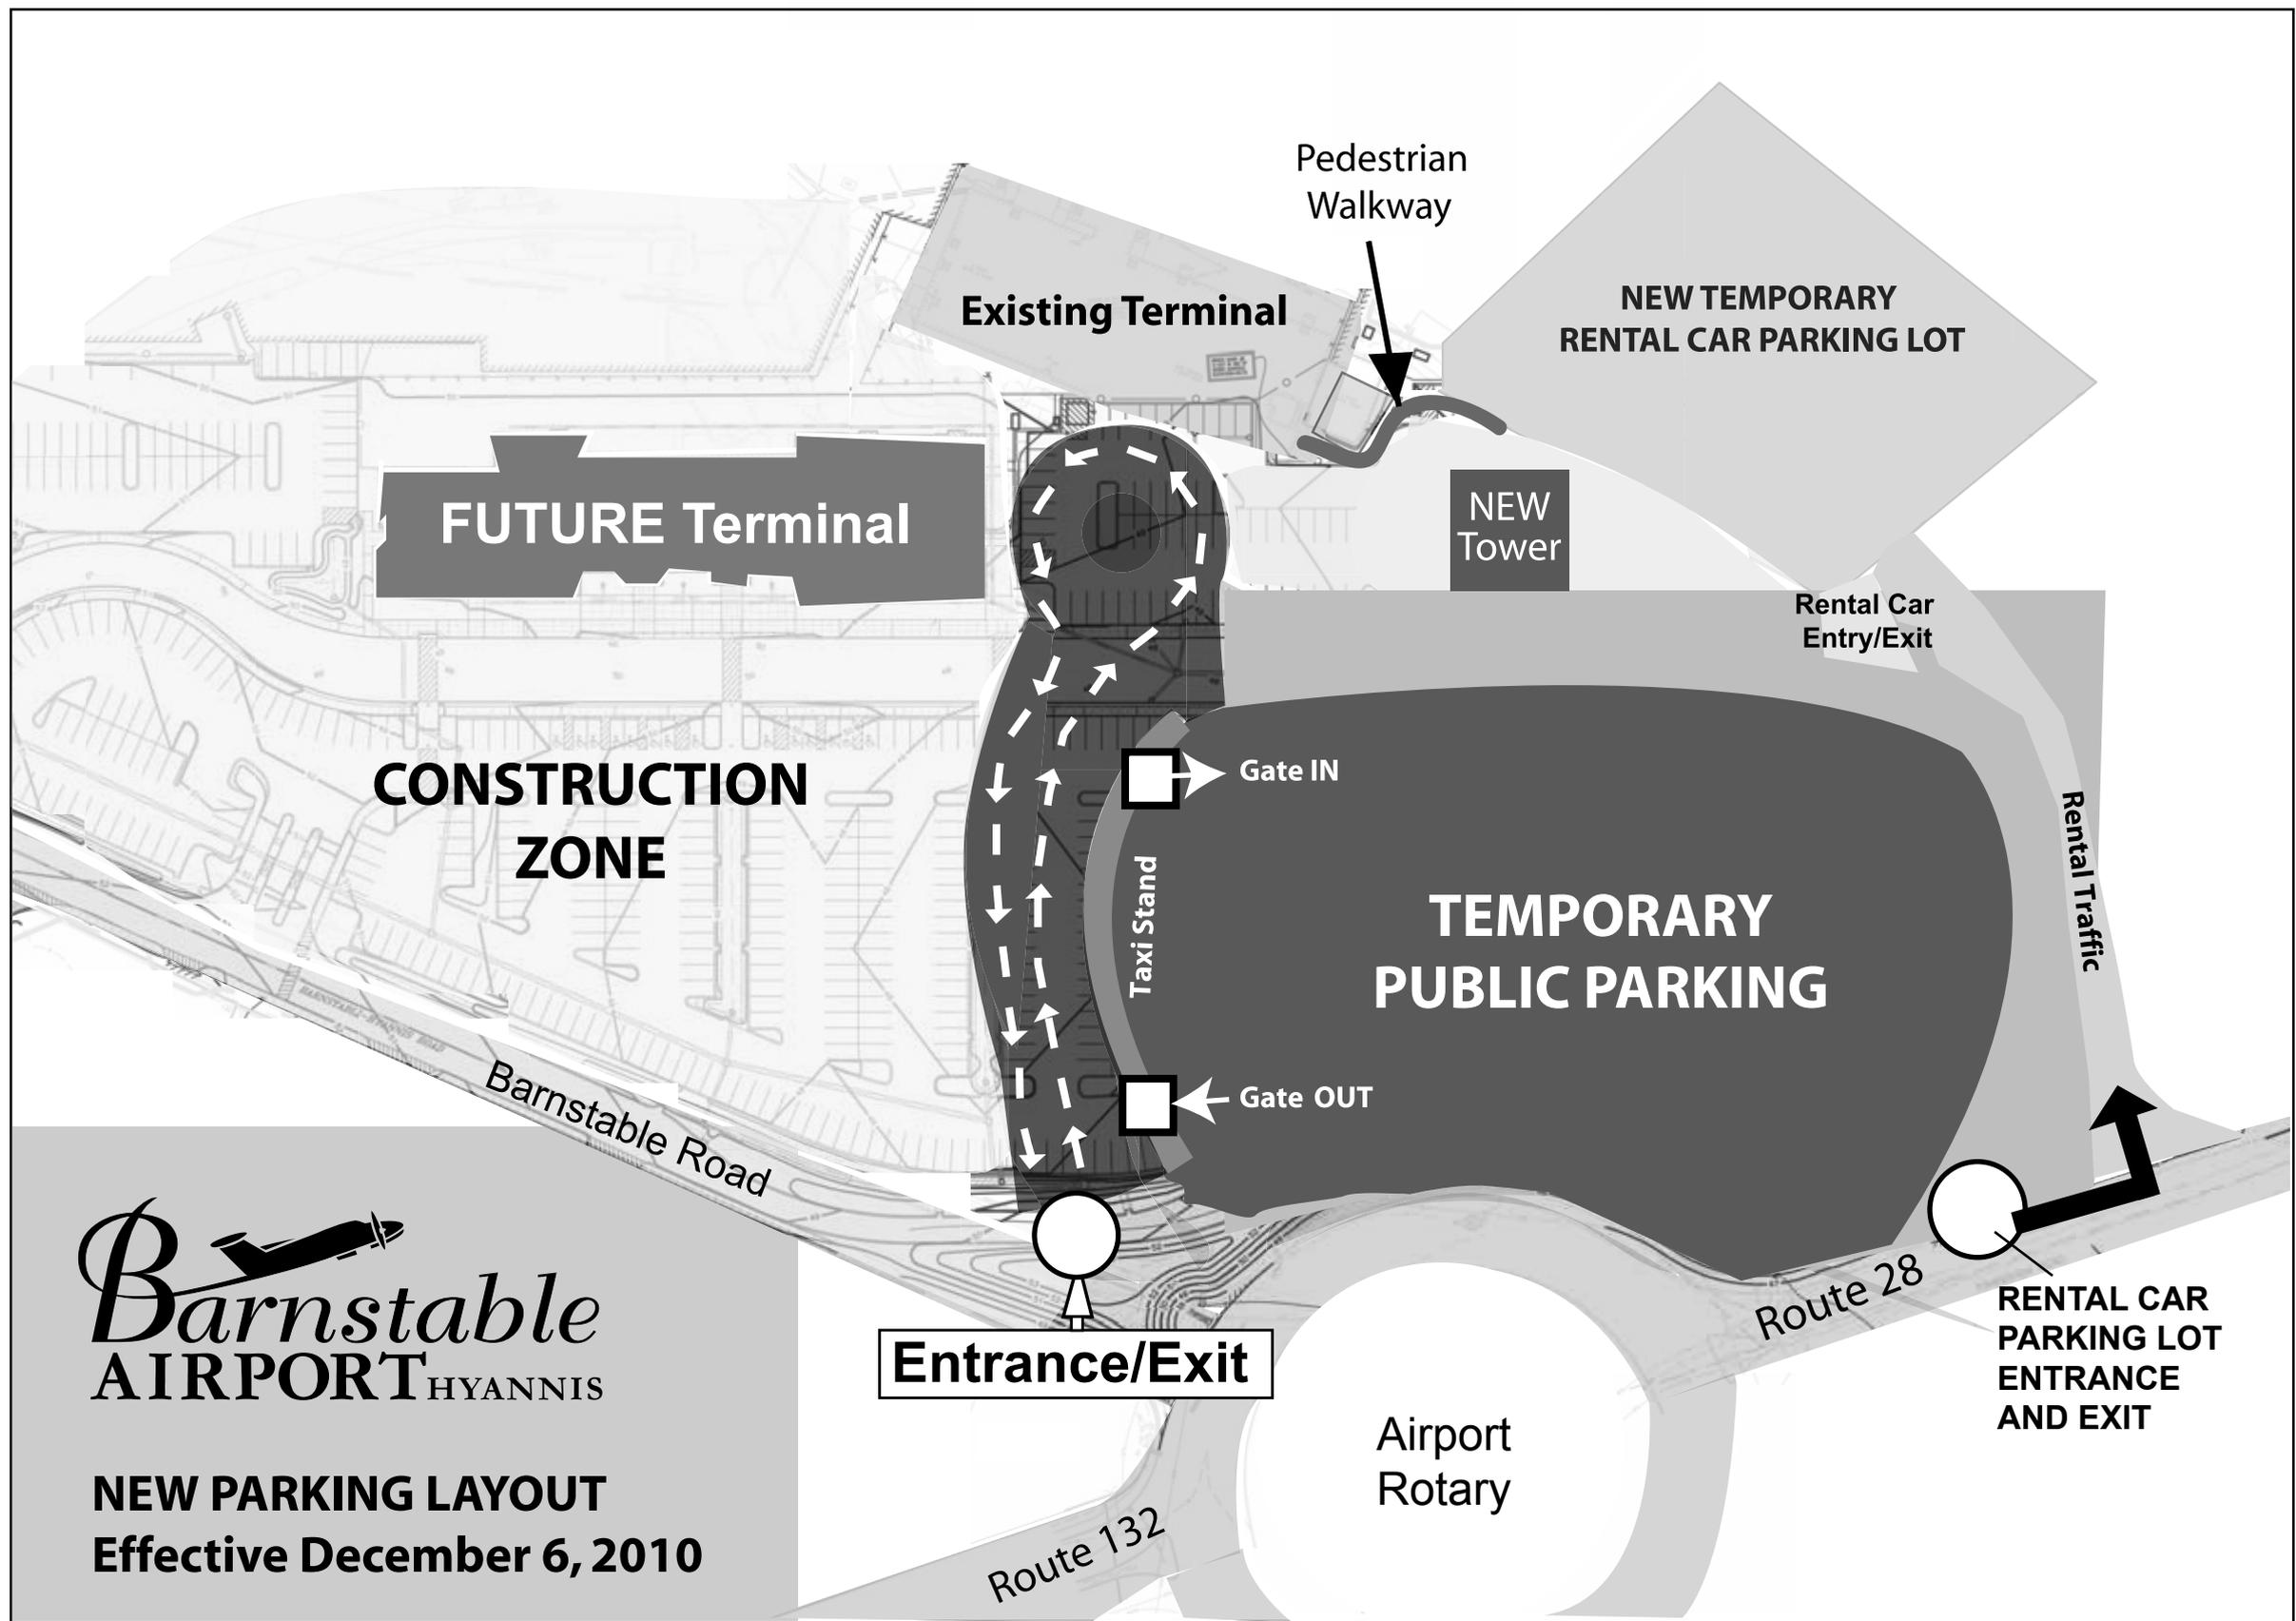

Since the current main lot will become a construction zone for the new terminal, contractors may have to “work around” cars that have been parked there for the long-term, Breault said. Signs and notices have been posted.

In addition, motorists returning rental cars will have to take a sharp right turn after entering the airport from Route 28 where the old TD Bank building used to be.

Breault said use of the temporary parking lot will be discontinued next spring when parking will shift to new lots created as part of the overall airport improvement program.
